SUMMARY

Aspiring Full-stack Engineer and Computer Science student with a strong foundation in JavaScript and React. Currently developing a tenant management platform to enhance community engagement and user experience. Eager to apply technical skills to contribute to production codebases and grow through mentorship.

EDUCATION

University of Victoria – *Victoria, BC*

September 2028

Bachelor of Science in Computer Science

Coursework: Logic & Foundations, Calculus II, Linear Algebra, Object-Oriented Programming, Professional Communication, Intro Psychology.

Golden Gate University – *Remote*

May 2025

Associate of Science in Applied Computing

Achievements: Dean's List Scholar (Fall '23)

SKILLS

Languages: JavaScript, Node.js, Express.js, EJS, PostgreSQL, Java, React, HTML5/CSS3

Technical: Git, REST APIs

Networking: Active Directory, TCP/IP, Subnetting, IP, DNS, DHCP

AWARD & CERTIFICATIONS

- **Google IT Support Certificate:** Google IT Support Certificate – Coursera (December 2023) Covered: Networking, System Administration, OS, IT Infrastructure, and Technical Support
- **21st Century Leadership Seminar:** 21st Century Leadership Seminar – PGLF (September 2022)
- **University of Chicago (September 2022):** Rise Entrepreneurship Bootcamp, Rise Leadership Bootcamp, Rise Public Policy Bootcamp
- **Schmidt Futures & Rhodes Trust:** '21 Rise Global Finalist

PROJECTS

Tenant Management Platform, *Open-source Project*, Remote

May 2025 - Present

- Developing a web application for landlords and tenants to manage contracts, payments, and messages
- Focusing on building secure, scalable RESTful APIs and user-friendly interfaces
- Exploring secure authentication, encryption, and currently learning and implementing Node.js, Express.js, PostgreSQL, and React for the architecture

iOS App Development Student, *CodePath*, Remote

Feb 2024 - Apr 2024

- Built a Swift-based app with user authentication, networking, and UI features using MVVM architecture
- Integrated REST APIs and local persistence; applied JSON parsing, delegates, and table views
- Worked collaboratively in a 4-person team, leading workflow chats

Outlier Odyssey - Group Project, *Golden Gate University*, Remote

May 2023 - Aug 2023

- Worked on a 2D game to learn programming logic through a scenario-based navigation challenge
- Implemented core Java concepts: OOP, constructors, inheritance, multidimensional arrays, control flow, and string manipulation
- Led a peer support community via Discord to help other students understand Java concepts
